

A unique meeting for human subject research professionals

Advancing Ethical Research Conference

Boston, MA | November 7-9 | Pre-Conference Programs: November 6

Public Responsibility in Medicine and Research (PRIM&R)'s **2013 Advancing Ethical Research (AER) Conference** has been designed to reflect and respond to the fast-paced changes in research and their implications for ethical oversight. Experts in the field will discuss the latest regulatory updates, emerging issues, and best practices to help you confront longstanding and late-breaking challenges in human subjects protections. Return to your office able to run your program more effectively and efficiently.

The conference will consist of 16 plenaries and 125 breakout sessions. Topics include:

- Global research
- Genetics and genomics research
- Big data and the demand for data transparency
- Cluster randomized trials in social and behavioral research
- Pragmatic clinical trials
- Finding and applying flexibility in federal regulations
- The rise of participant-led and -centered research
- Best practices in IRB administration

Network with and learn from colleagues and partners in the field, including:

- Federal agency representatives
- Researchers working with human subjects
- Institutional officials
- Those serving on IRBs or other research ethics committees in the US and abroad
- Representatives of industry and contract research organizations
- International partners and counterparts

Registration closes **November 1**. Visit us online to learn more about the conference program and special events, fees, and special hotel rates.
